

Place emergency calls only.

After a disaster, especially earthquakes, there is usually a high volume of telephone calls. It is important that the customer limits their calls to emergencies only. Do not call 911 or the police for confirmation of an earthquake. Listen to the local radio or television station for information.

Out-of-Area Contact:

Select a relative or friend who is not in the immediate area to act as a contact for information about your family. Once contact is made, have this person relay messages to your friends and relatives outside the disaster area.

911 WARM DIAL TONE:

If the customer's line has been disconnected due to non-payment, the line will still have access to 911 service for 120 days from the date of disconnect.

When calling 911, the customer's telephone number and address may be displayed on a dispatcher's viewing screen, even if the customer has Caller ID Blocking. This enables the emergency agency to locate the customer if the call is interrupted. To avoid having the telephone number and address displayed, call the non-emergency number.

Consult the telephone directory for similar information concerning the use of the telephone in emergency situations. For Telecommunications Devices for the Deaf (TDD) emergency calls, use the Baudot mode only; dial 911, then tap the space bar until someone answers.

Communications Service Restoration After an Emergency:

In the event of a widespread telecommunications outage caused by a disaster such as severe weather, fire, flood, or earthquake, TDS Telecom restores service as quickly as possible for all customers providing priority to 911 and other public safety service providers, medical facilities, utility companies, and government. Restoration efforts in some cases may be delayed until fire crews or power companies allow TDS Telecom personnel access to the affected area.

800 & 900 TELEPHONE NUMBERS

Think twice before dialing that 800 (888, 855, 866, 877) or 900 telephone number. The customer may be charged for what was thought to be a free call, and the customer's phone number could be recorded in a database sold to telemarketers.

The CPUC wants consumers to know that some companies listing 800 or 900 numbers are now using Automatic Number Identification (ANI) which is approved by the Federal Communications Commission. When the customer dials an 800 or 900

number, ANI equipment may automatically add their number to the customer database, and companies are not required to tell the customer if they have ANI.

Companies with ANI can then use the customer's phone number to get the customer's address, income level, items purchased, and similar information from other marketing databases. Or these companies can sell the customer's number to telemarketers, who may soon start pitching the customer on their products and services. Never assume that an 800 or 900 number is a free call! If the number uses ANI, the customer may reach a recording advising that they will be called back collect. The call-back could be billed to the customer.

If a person answers an 800 or 900 number, the customer can advise them that the customer doesn't want their number, name, or address kept in his or her company records. The customer may also want to make it clear that they don't want this information sold to other companies, or for the company to solicit future business from them.

To submit a complaint about a company using ANI, write to:

Office of the Attorney General
Public Inquiry Unit
P.O. Box 944255
Sacramento, CA 94244-2550
or call 1-800-952-5225
www.oag.ca.gov/consumers

PROTECT YOUR CONSUMER RIGHTS

Help protect against unsolicited telephone marketing calls and faxes.

Customers have the right to privacy and protection from potential telemarketing fraud, and unsolicited sales calls and faxes. The laws apply to live calls, prerecorded voice calls and artificial (computerized) voice calls.

The Federal Communications Commission (FCC) has adopted rules and regulations, effective December 20, 1992, implementing The Telephone Consumer Protection Act (TCPA). Different rules and regulations apply to calls placed to homes and businesses.

The Federal Trade Commission (FTC) also has telemarketing sales rules, which have been enacted to help protect consumers.

State laws are in place to protect citizens who have had their privacy violated or have been victims of fraudulent telemarketers. The State Attorney General's office, along with the telemarketing sales rules, has the authority to investigate and prosecute fraudulent telemarketers who operate across state lines.

State Law AB 2134, effective January 1, 1999, requires communications carriers to provide customers with published information generally describing telephone subscribers' rights under the state and federal law.

This information is available to the customer by contacting the agencies listed below. If the customer has questions or complaints, they may contact the:

**California State Attorney General's Office
Public Inquiry Unit**

Office of the Attorney General
Public Inquiry Unit
PO Box 944255
Sacramento, CA 94244-2550
1-800-952-5225

National Fraud Information Center (NFIC)

This is a private, non-profit organization that operates a consumer hotline to provide services and assistance in filing telemarketing complaints. NFIC forwards appropriate complaints to the Federal Trade Commission for entry into its telemarketing fraud database. 1-800-876-7060 (9 a.m. - 5:30 p.m. Eastern Standard Time (EST), Monday – Friday)

BILLING DISPUTES

If the customer believes there is an error on their bill or has a question about their service, please call TDS Telecom customer support at 1-888-225-5837. If the customer is not satisfied with the response, they may submit a complaint to the California Public Utilities Commission (CPUC) by visiting www.cpuc.ca.gov/complaints/. Billing and service complaints are handled by the CPUC's Consumer Affairs Branch (CAB), which can be reached by telephone or mail if they prefer not to submit a complaint online:

Telephone: 1-800-649-7570 (8:30 a.m. to 4:30 p.m., Monday through Friday)
Mail: California Public Utilities Commission,
Consumer Affairs Branch, 505 Van Ness Avenue,
Room 2003, San Francisco, CA 94102

Customers with hearing or speaking limitations should dial 711 to reach the California Relay Service. If the customer prefers having calls immediately answered in their mode of communication, they should dial one of the toll-free language-specific numbers below to be routed to the California Relay Service provider.

TY/VCO/HCO to Voice/English 1-800-735-2929,
Spanish 1-800-855-3000.

Voice to TTY/VCO/HCO/English 1-800-735-2922,
Spanish 1-800-855-3000.

From or to Speech-to- Speech/English &
Spanish 1-800-854-7784.

To avoid having service turned off while waiting for the outcome of a CPUC complaint regarding billing accuracy, the customer may contact CAB for assistance. If the customer's case meets eligibility criteria, CAB will provide them with instructions on how to mail a check or money order to be impounded pending resolution of their case. The customer must continue to pay their current charges while their complaint is under review to keep service turned on.

**IMPORTANT PRIVACY INFORMATION
THE CUSTOMER'S NAME AND TELEPHONE
NUMBER CAN BE SEEN BY EVERYONE
THEY CALL... UNLESS THEY BLOCK IT!**

Any telephone from which the customer places a call will automatically transmit its number to the person they are calling. If the customer places a call from their residence, their name will also be transmitted. If the person they are calling subscribes to the service known as Caller ID, they will be able to see the customer's name and telephone number before they answer their phone. The customer should decide who receives their name and telephone number: the law guarantees you that right. TDS Telecom also believes the customer should be able to choose how they would like to have their phone number blocked—the customer's privacy is paramount. This is why the law requires FREE blocking services that gives the customer the freedom to choose when, how, and if their number will be shown to those they call.

COMPLETE BLOCKING

Complete blocking is a FREE service, which gives the customer permanent control over the transmission of their name and telephone number. Complete Blocking blocks the transmission of the customer's name and telephone number on the calls they place, unless they specify otherwise. There is no need to enter a code before making each call. Those with Caller ID units who receive the customer's calls will see the word PRIVATE displayed. The customer may deactivate Complete Blocking on specific calls by pressing *82 on their touch-tone telephone before dialing (or by dialing 1182 on a rotary telephone).

SELECTIVE BLOCKING

Selective Blocking is a FREE service, which blocks the customer's name and telephone number from being transmitted and/or seen on Caller ID units on a per call basis. By pressing *67 on their touch-tone phone (or by dialing 1167 on a rotary telephone) before placing a call, the customer's name and telephone number will not be transmitted. Those with Caller ID units who receive the customer's call will see the word PRIVATE displayed. If the customer does not select a blocking option, they will be assigned Selective Blocking. If the customer wishes to change their initial blocking option or the blocking option assigned to their telephone, they may do so free of charge.

IMPORTANT NOTE:

Caller ID blocking may not work on interstate calls. Also, the customer cannot block transmission of their name and telephone number for calls to 911, 800, 855, 888, 866, 877, or 900 services, regardless of the blocking option they choose. If, for some reason, the customer wants to report an emergency without having their name and number displayed, they should call the agency's 7-digit number instead of 911. If the number they're calling from is not equipped with Complete Blocking, they'll need to press *67 before they dial the agency's number to block their name and number from being shown (or by dialing 1167 on a rotary telephone).

If the customer has any questions about their choices or the effect any of these services may have upon their privacy, they may call our business office at the toll-free number below.

	N/A	\$0.25

Customers may be exempt from Local Directory Assistance charges if the customer, or a member of the household, is unable to use a telephone directory due to visual or other physical limitation. Exemption will be granted upon receipt of a completed exemption form certifying the visual or other impairment. If the customer is eligible for waiver of Local Directory Assistance charges, please call 1-888-CALL-TDS (1-888-225-5837) to request a certification form.

SPECIAL SERVICES FOR THE DEAF, HEARING IMPAIRED AND/OR DISABLED

The California Telephone Access Program (CTAP) distributes telecommunications equipment and services to individuals certified as having functional limitations of hearing, vision, mobility, speech and/or interpretation of information. Please call CTAP at 1-800-806-1191 or TTY at 1-800-806-4474 for details.

The California Relay Service (CRS) provides specially-trained operators to relay telephone conversations back and forth between people who are deaf, hard of hearing, or speech-disabled, and those they desire to communicate with by telephone. The customer can reach CRS by dialing 711.

THE REMAINING RATES AND SERVICES APPLY TO BOTH RESIDENTIAL AND BUSINESS CUSTOMERS.

ONE-TIME SERVICE CHARGES

Service Ordering:
Central office connection work, per line \$8.50
Move and change, each order \$4.00
New or additional service, each line..... \$8.00
Premises visit charge (if required)..... \$30.00
Reconnect charge for nonpayment \$8.25
Return check charge \$5.00

If the customer's presence is required, TDS Telecom will inform the customer of the right to service connection or repair within a four-hour window at the time the customer calls for service connection or repair. Whenever the customer requests a four-hour appointment, then TDS Telecom and the customer will agree, prior to the date of service connection or repair, on the start time for the four-hour service connection or repair period.

VISIT CHARGE

One-time charge for visit
Regular hours (8 a.m. – 5 p.m., Monday-Friday).....\$20.00
Overtime \$30.00

LINE EXTENSION & SERVICE CONNECTION

Free footage allowance 1,000 ft.
(up to a maximum of 300 feet on private property).... No Charge
Exceeding free footage allowance:
First 100 feet or fraction thereof..... \$50.00
Each additional foot or fraction thereof \$.50

OFF-PREMISES EXTENSION ON NON-CONTINUOUS PROPERTY

First 1/4 mile or fraction thereof \$2.00
Each additional 1/4 mile or fraction thereof \$1.00

INSIDE WIRE

Inside Wire (IW) consists of all wiring and materials on the customer's side of the demarcation point determined by TDS Telecom in accordance with the rules and regulations of the California Public Utilities Commission. The demarcation point is that point where TDS Telecom telephone lines enter your building or home (usually the Standard Network Interface (SNI) or Protector).

INSIDE WIRE REPAIR

If a Technician is dispatched and the trouble is determined to be on the customer's side of the Network Interface Device (NID), CHARGES WILL APPLY. To avoid unnecessary charges, the customer will be advised to check at the NID.
If the customer does not request inside wire work, the appropriate Visit Charge above applies. If the customer does request inside wire work, the above appropriate Visit Charge applies, along with the following Labor Charge:

First Hour (Regular hours: 8 a.m. – 5 p.m., Monday-Friday) \$35.00/hour
Overtime (After Hours: Monday through Friday and Saturday) \$40.00/hour
Overtime (Sundays and Holidays)..... \$45.00/hour
Each additional 15 minutes or fraction thereof \$15.00

(The above per hour charges are measured from the time of dispatch of the TDS Telecom's personnel to the time of departure of the TDS Telecom's personnel from the customer's premises.)

INSIDE WIRE MAINTENANCE PLAN (IWMP)

For customers who subscribe to the IWMP, in most cases jack and wiring repairs may be performed at no charge. This repair plan is optional and isn't required for basic monthly service. The IWMP costs \$1.00 a month for each line.

SPECIAL CONDITIONS - INSIDE WIRE SERVICE

Billable time includes travel, work preparation, actual work, and cleanup. Labor charge begins upon arrival at or on the customer's premise. Travel charges begin from the time that TDS Telecom's personnel is dispatched to the customer's premises
Charges for materials may be applicable in addition to labor. TDS provides a 30-day warranty for repairs of simple inside wiring.

If TDS Telecom's personnel are dispatched to isolate trouble and the customer requests inside wiring maintenance, then the labor charge above will apply in place of the visit charge.

TROUBLE ISOLATION PROCEDURE

If the customer is having problems with the phone and wants to see if the problem is due to the inside wire (IW), the customer should unplug the IW at the Standard Network Interface (SNI) and plug in a phone known to be in working order into the SNI. If the phone does not work at the SNI, the trouble is most likely in TDS Telecom's network. At that point, the customer should notify TDS Telecom at 1-800-CALL-TDS (1-800-225-5837) and TDS will arrange for repair as soon as possible.

If the phone works at the SNI, the trouble is with the IW
The customer may: (1) repair the IW, (2) contact TDS Telecom for repair; or (3) pay a third party to repair it.
If the customer chooses not to perform the test at the SNI, TDS Telecom can perform the test. However, if the trouble is with the IW, the customer will be charged for the time spent performing the test at the rates listed above. *Note: Landlords are responsible for installing at least one useable telephone jack and for placing and maintaining the inside telephone wiring in working order.

CALL BEFORE YOU DIG

Call two working days before you dig to allow underground facilities to be located and marked at no charge. Call 1-800-227-2600 or 811.

Third-Party Charges

If the customer wishes to have charges from third-party providers blocked and no longer included on the telephone bill, please contact TDS Telecom. This service is provided free of charge.

Single Carrier, Same Transaction\$1.25

WHAT THE CUSOTMER NEEDS TO KNOW ABOUT 911

When there is a situation that threatens human life or property and demands immediate attention, call 911. 911 will reach Fire and Rescue, Police, Sheriff, Highway Patrol, Ambulance, Paramedics, Coast Guard, and/or Search and Rescue services. Do not call 911 for non-emergencies. This causes delays in the handling of real emergencies.

NON-EMERGENCY NUMBER

Hornitos(209) 376-9961

If you need to place an emergency call:
During a power outage, 911 service may still be available on the customer's wireline phone, even if the customer does not hear a dial tone.
Make sure that no extension telephones are off-hook.
Stay on the line. The customer may not hear dial tone immediately. The delay could be as long as a minute or more.

Do not repeatedly depress the switch hook, as this will further delay the call. If the customer receives a "fast busy" or "all circuits are busy" recording, hang up and try again later. If physical damage occurs to the Telephone equipment, facilities, or to the wiring or equipment, it may not be possible to complete the call until the damage has been repaired.
